

OUR PHILOSOPHY

In a world inundated with disposable goods, we choose to anchor ourselves in the time-honored traditions of craftsmanship and thoughtful design. Our distinctively Japanese approach combines over 50 years of artisanal mastery with cutting edge techniques in manufacturing. This approach guides a philosophy that is rooted in experimentation and is unmistakably Matsuda.

We celebrate the convergence of past and present and the eclectic result of East meets West. We trust in the wisdom of studied craft informing design and in creating beautiful objects that promote individuality and expression; objects that last a lifetime.

250 STEPS, 17 HOURS, 13 CRAFTSMEN

Each of our designs is crafted by hand in the renowned eyewear workshops of Sabae, Japan - requiring up to two years and as many as 250 steps to bring to life. This is eyewear created through 50 years of experimentation and creative exploration: each frame reflecting a unique journey from concept to construction. We never stop seeking new innovative techniques to express fresh ideas.

NEW RELEASE

M1021

M1021 CORE

DESCRIPTION

The M1021 is a forward thinking modified pantos style crafted of hand sculpted Japanese acetate highlighted by a signature riveted hinge. The shape is inspired by the character defining acetate frames worn in the late 1950s and early 1960s. It is available as an optical style as well as a sunglass.

2871H

2871H HERITAGE

DESCRIPTION

Influenced by Matsuda's love of turn of the century architecture seen throughout Europe, the 2871H embodies the industrial era. The side shields are made of a ribbed titanium contrasted with a softer acetate front. The unique shape is still very approachable while showing our love of exploring bold new styles.

10611H

10611H HERITAGE

DESCRIPTION

There is no city more influential to Mitsuhiro Matsuda's creations than Paris, France. The 10611H is a technical masterpiece whose orante metal construction and folding side shields offer a nod to the gothic architecture that Matsuda discovered while living there in his youth.
