

ic! berlin 

**summer collection 2018**

new ic! berlin glasses, occhiali, lunettes,メガネ and brillen

**ich bin ein ic! berliner**

Oops!... We did it again.

In 1996 we changed the way people think about eyewear with our revolutionary screwless hinge. Often copied, never bettered, the ic! berlin hinge paved the way for a whole new industry of screwless eyewear. In 2017 our hinge turns 21. It's all grown up. It can finally buy beer in the USA. And it has spawned.

This year we introduce a brand new screwless hinge, thinner and stronger than ever. Measuring only 3.5mm across, this new hinge uses a patented hook-and-snap system to secure the temple to the front: no clips, no screws, no bells or whistles. Developed right here in Berlin, our new hinge inspired a new collection of weightless, airy eyewear. Preview the silk collection.

Speaking of handmade in Berlin, our shiny new autumn winter 2017 | 18 collection is bigger and Berlin-er than a Currywurst wrapped in a Döner Kebab. We worked closely with kids, their parents and their opticians to develop a new line of eyewear specially tailored to younger, still-growing faces. For the grown-ups we looked to the suprematism art movement and created a collection based on sharp lines and fundamental geometric shapes. We have brand new rubber eyewear, new exclusive colours and new inductees into the crew.

If all that wasn't enough for you, you can click through our entire collection at [www.ic-berlin.de](http://www.ic-berlin.de) or see it live and in the sheetmetalflesh in our Berlin Flagship Store at Münzstraße 5, 10178 Berlin-Mitte.

Still have questions? You know what to do – call Ralph! +49 (0)177 2409150

With warmest sheetmetalregards,

Ralph Anderl  
Worldwide Sheetmetalglassessalesman

*,Mr Ralph A. wears the frame like a macho man.  
Or is it a business man? Could be a bus driver  
in his smart casual holiday outfit as well.  
Anyway, be prepared for classy glasses and a  
serving of prudent bondageism.' R.A.*

Relaunch: sometimes good old friends come back, and sometimes glasses do too!

More than new: supernew!

Polarized: the magic that allows you to see through walls and shirts ... Almost. It also eliminates glare.

[available with asian nosepads]

A specially designed bridge to fit noses of ic! berlin shapes. East, west, north or south, ic! berlin has got your nose covered!

**The Green Collection:** Performance-enhancing eyewear to help you keep track of your balls.

info

## Technical Information - metal

### technic!al information

ic! berlin frames and components are cut from 0,5 mm, highly flexible stainless steel. The frames are constructed from just three simple parts: front frame, temple and a clip which secures the lens. This production method is unique in the eyewear industry. The front frame is joined at the temple to a tension based hinge that functions without screws. No tools are necessary to assemble the individual parts. The temple snaps easily into the front frame and can be disassembled just as quickly. This system makes changing lenses easier than ever. To release the lens, simply unhook the temple and remove the sleeve that holds the frame together. The sheet metal glasses are also exceptionally light weighing between 11 and 28 g.

The material is pliable and can be adjusted to fit any wearer. Extreme light weight and precision adjustment capability have been combined to ensure maximum wearing comfort. ic! berlin frames are virtually indestructible. The pieces snap back together in seconds, and if the frame is bent, the wearer can easily reshape the frame back into its original form.

### technische information

ic! berlin Brillen und ihre Bestandteile sind aus sehr flexiblen 0,5 mm Edelstahl geschnitten. Der Rahmen besteht aus mehreren Teilen: der Front, einem linken und einem rechten Bügel und zwei Klammern, welche die Gläser halten. Diese Produktionsweise ist einzigartig in der Welt der Brillen. Die Front schließt an der Bügelseite in ein schraubenloses Federsteckscharnier. Um die einzelnen Teile miteinander zu verbinden, sind keine Werkzeuge nötig. Der Bügel schnappt in die Front und kann genauso schnell wieder abgenommen werden. Das Auswechseln der Gläser ist durch dieses Verfahren einfacher denn je. Um das Glas herauszunehmen, wird einfach der Bügel abgenommen und die Klammer, die den Frontrahmen zusammenhält abgezogen. Die ic! berlin Blechbrillen sind außergewöhnlich leicht. Ihr Gewicht liegt zwischen nur 11 und 28 g. Das Material ist sehr biegsam und kann so jedem Gesicht angepasst werden. Die Kombination aus extremer Leichtigkeit und präziser Anpassung gewährleistet maximalen Tragekomfort. ic! berlin Brillen sind nahezu unzerstörbar. In Sekundenschnelle lassen sich die Einzelteile wieder zusammensetzen und sollte der Rahmen einmal verbogen sein, kann der Benutzer die Brille schnell wieder in die ursprüngliche Form zurückbiegen.

### informations techniques

Les lunettes ic! berlin et leurs composants sont taillés dans un acier affiné très souple de 0,5 mm d'épaisseur. La monture est constituée de plusieurs parties: le devant, une branche gauche et une branche droite, ainsi que deux agrafes qui tiennent les verres. Ce mode de production est unique dans le monde des lunettes. La partie de devant se rattache au côté de la branche par une charnière à emboîtement à ressort sans vis. Pour assembler les différentes pièces entre elles, aucun outil n'est nécessaire. La branche s'emboîte par enclenchement dans la partie du devant et peut en être ôtée tout aussi rapidement. Grâce à ce procédé, le changement des verres est plus simple que jamais. Pour enlever le verre, la branche est simplement démontée, et les agrafes qui retiennent la partie de devant, enlevées. Les lunettes en métal ic! berlin sont d'une légèreté exceptionnelle. Leur poids se situe entre 11 et 28 g seulement. Le matériau est très souple et peut ainsi être adapté à chaque visage. La combinaison des caractéristiques de légèreté extrême et de précision d'adaptation garantit un confort de port maximal. Les lunettes ic! berlin sont quasiment indestructibles. Les pièces qui les composent se réassemblent en quelques secondes et, au cas où la monture serait tordue, l'utilisateur peut rapidement lui rendre sa forme initiale.

### informazioni tecniche

Gli occhiali ic! berlin sono in acciaio inossidabile molto flessibile, tagliato 0,5 mm. La montatura è composta da diverse parti: frontale, asta destra e sinistra e due clips che tengono le lenti. Questo modo di produzione è unico nel mondo degli occhiali. Il frontale è collegato con le aste mediante una cerniera elastica a innesto, senza nemmeno una vite. Per assemblare i singoli componenti non servono utensili. Le aste vengono innestate nel frontale e si tolgono in maniera altrettanto semplice. Per cambiare le lenti basta togliere le aste e le clips che tengono insieme la bordatura frontale. Gli occhiali ic! berlin in lamiera sono estremamente leggeri: pesano solo da 11 a 28 g. Il materiale è pieghevole e si adatta perfettamente ad ogni forma del viso. La combinazione di massima leggerezza e massima adattibilità assicurano un ottimo comfort. Gli occhiali ic! berlin sono quasi indistruttibili. I diversi componenti possono essere rimontati in un batter d'occhio. Se la montatura dovesse piegarsi potete raddrizzarla in un attimo.

### 技術情報

アイシー!ベルリンのフレームおよび部品は、柔軟性の高い0.5ミリ厚のステンレススチールをカットしたものです。フレームは三つのシンプルなパーツにより構成されています。フロントフレーム、テンプル、そしてレンズを固定する役割を果たすクリップの三つがそれ。このような製造方法は、アイウェア業界唯一のものです。フロントフレームをテンプルと結ぶヒンジにはバネの力を利用しており、ネジは使われていません。メガネを組み立てるのに工具は一切不要。テンプルをフロントにはめるだけと簡単で、分解するのもあっという間です。このような構造のおかげで、レンズの交換が今までになく簡単になりました。テンプルを外して、フレームを留めているクリップを抜き取るだけです。また、シートメタルメガネは超軽量、重さは僅か11から28グラムです。フレームの素材は曲げて調整することができますので、どのような方にもぴったりフィット。極限の軽さと微妙な調整のきく素材が相まって、最高に快適な装着感を保証します。アイシー!ベルリンのフレームはいわば破壊不能。一旦ばらばらになっても、瞬時に組み立てることができ、フレームが曲がってしまってもすぐにもとの形に戻すことができます。

### 기술 정보

아이씨 베를린이 사용하는 안경의 부품은 0.5 mm 사이즈로 커팅되었으며, 매우 유연한 스테인리스 스틸로 만들어 집니다. 모든 안경은 단지 세 가지 파트로만 구성되었습니다. 앞면 프레임, 템플과 렌즈를 안전하게 장착해주는 클립입니다. 이러한 생산방식은 안경 업계에서도 저희가 유일하게 사용하고 있습니다. 앞면 프레임은 나사 없이 기능하도록 제작된 힌지가 주는 탄력에 의해 템플과 하나의 안경으로 결합됩니다. 각각의 파트를 조립하는 데에는 어떠한 도구도 필요하지 않습니다. 템플은 매우 간편하게 앞면 프레임으로 찰칵 하는 사이에 들어가며, 또한 매우 빠르게 분리가 되어 나옵니다. 이러한 기술이 렌즈를 매우 쉽게 안경에 끼우도록 합니다. 렌즈를 빼기 위해서는 단지 템플을 분리한 다음 양쪽 프레임을 잡아주는 슬리브를 빼주시면 됩니다. 이 메탈 안경들은 극도로 가볍게 제작되어 무게가 11 - 28g(0.4 - 1.0 oz) 정도 밖에 나가지 않습니다. 또한 유연한 재질을 사용하기 때문에 착용하는 사람에 따라 얼마든지 조정 가능합니다. 대단히 가벼우며 세세한 조정까지 가능하기 때문에 최고의 착용감을 보장합니다. 아이씨 베를린의 안경은 사실상 파괴되는 것이 불가능하기에, 만일 안경이 휘었다면, 사용자가 손쉽게 안경을 원래의 상태로 되돌릴 수 있습니다. 그램을 넘지 않습니다. 또한 아세테이트는 단단하고 견고한 재질이기 때문에, 말 할 필요도 없이 불필요하게 힘을 가한다거나 하는 것은 바람직하지 않습니다.

## Technical Information - acetate

### technic!al information

Our acetate glasses are made of extremely lightweight and durable spring-steel-sheets and acetate.

They can bear quite a lot, nevertheless we advise you that excessive and unnecessary mechanical influences should be avoided.

Our acetate models are neither glued, screwed nor demolished. The clips and frames are completely detachable.

The metal contains a small quantity of carbonate, chrome and atomic bound nickel, as a rule it is also suitable for people with allergies.

Furthermore the acetate endings of the frames prevent constant contact with the skin.

Acetate is an anti-allergic, synthetic plastic made of organic fibers.

Due to the structure of this non-petroleum product differences in colours and patterns can occur.

This is no reason for complaints.

The acetate frame is milled from one piece. As the nose bridge is not glued, the acetate frame remains stable and durable. Furthermore, all colours are uv-stabilized. Stainless steel can not be dyed, but only extremely thin coated.

Due to mechanical stress there can be changes on the outer coating of the hinge. This phenomenon is rarely visible and can hardly be avoided with long term usage. However, this only adds to the charm of the glasses’ history.

Acetate glasses are qualified for the use of mineral lenses. If you decide for synthetic lenses please consider:

**do not choose polycarbonate lenses**, as acetate and polycarbonate are like cat and dog.

### technische information

Unsere Acetat Brillen bestehen aus sehr leichtem, widerstandsfähigem Federblech und Acetat.

Sie vertragen einiges, dennoch raten wir von allzu aggressiven und damit unnötigen mechanischen Kräfteinwirkungen ab.

Unsere Acetat Modelle sind nicht geklebt, geschraubt oder eingeschossen.

Die Verbindungsklammern und Metallbügel sind komplett abnehmbar. Das Federblech enthält Kohlenstoff, Chrom und atomar gebundenes Nickel in geringer Menge, somit ist es im Regelfall auch für Allergiker geeignet. Die Acetatbügelenden verhindern zudem einen ständigen Kontakt mit der Haut.

Acetat ist ein antiallergischer, synthetisierter Kunststoff aus organischen Fasern. Da es also kein Erdölprodukt ist, können materialbedingt Abweichungen in Farbe und Muster auftreten. Dies ist kein Reklamationsgrund.

Der Acetatrahmen wird aus einem Stück gefräst. Da die Backen und Nasenstege nicht angeklebt sind, bleibt die Acetatfront formstabil und langlebig. Alle Farben sind zudem UV-stabilisiert. Federedelstahl lässt sich nicht durchfärben, sondern nur hauchfein beschichten. Daher kann es Aufgrund von mechanischer Beanspruchung zu Veränderungen der Oberfläche im Bereich der Gelenke kommen. Diese Patina ist kaum sichtbar und lässt sich auf Dauer nicht vermeiden, trägt aber zum Charme und der Historie der Brille bei.

Acetatbrillen eignen sich ideal für den Einsatz mineralischer Gläser, sollten sie sich für Kunststoffgläser entscheiden, beachten sie bitte: bei den Acetat Brillen von ic! berlin **keine Polycarbonatgläser einsetzen lassen**, Acetat und Polycarbonat sind wie Hund und Katz.

### informations techniques

Les montures de nos lunettes acetate sont fabriquées à partir d’acétate et d’acier souple, très léger et résistant.

Même si elles peuvent supporter bien des chocs, il est cependant déconseillé de les soumettre inutilement à des manipulations trop agressives.

Nos modèles acetate ne sont ni collés, ni vissés.

Les branches, ainsi que les clips qui les fixent à la face sont complètement amovibles. L’acier de la monture contient du carbone, du chrome et du nickel en très faible quantité afin que cela puisse normalement aussi convenir aux allergiques. Les manchons en acétate empêchent en outre un contact constant avec la peau.

L’acétate est un plastique de synthèse anti-allergique composé de fibres organiques. Comme il n’est pas produit à partir de pétrole, de petites irrégularités au niveau de la couleur du matériau peuvent apparaître. Ce n’est pas un motif de réclamation.

Le cadre en acétate est fraisé à partir d’une seule pièce.

Comme les clips et les plaquettes ne sont pas collés, la face en acétate ne se déforme pas et dure plus longtemps. Les couleurs sont par ailleurs résistantes aux uv.

L’acier spécial souple n’est pas teint dans la masse mais recouvert d’une couche de finition extrêmement mince. C’est pourquoi les contraintes mécaniques peuvent entraîner des modifications de l’aspect de la surface à proximité des charnières. Cette patine à peine visible, inévitable à la longue, participe cependant au charme et au vécu des lunettes.

Si vous avez besoin de verres correcteurs dans les lunettes ic!berlin acetate **ne pas utiliser des verres en polycarbonate**, le polycarbonate et l’acétate sont comme chien et chat.

### informazioni tecniche

I nostri occhiali “acetate” sono di lamiera elastica e acetato. Sono leggerissimi e molto resistenti. Sebbene molto ben sopportate, sconsigliamo sollecitazioni meccaniche eccessive inutili.

I nostri modelli acetate non sono incollati né avvitati. Le aste metalliche e le graffette di giunzione sono smontabili.

La lamiera elastica contiene carbonio, cromo e nichel con legame atomico in minima quantità, in modo tale da essere normalmente adatta anche a soggetti allergici. I terminali in acetato impediscono inoltre il contatto permanente con la pelle. L’acetato è un materiale plastico-sintetico antiallergico ricavato da fibre organiche. Non essendo un prodotto derivato dal petrolio, si possono verificare delle variazioni del colore e dei motivi dovuti alla composizione del materiale. Queste non costituiscono motivo di reclamo.

I nostri occhiali in acetato sono fresati dal pieno. Dato che gli angoli esterni della montatura e i naselli non sono incollati, il frontale in acetato mantiene la sua forma stabilimente per molti anni.

Tutti i colori sono stabilizzati ai raggi uv. La lamiera elastica non si lascia tingere con aggiunta di penetrante ed è possibile solo rivestirla con uno strato sottilissimo di colore. Pertanto le sollecitazioni meccaniche possono causare dei cambiamenti della superficie nella zona delle articolazioni.

Questa patina è praticamente invisibile e a lungo andare è inevitabile, contribuisce quindi al fascino e alla storia degli occhiali. Le montature in acetato sono ideali per le lenti minerali. Se però preferite le lenti di plastica, fate attenzione a quanto segue: **non montare lenti in policarbonato** nei modelli acetate di ic! berlin, dato che l’acetato e il policarbonato sono come cane e gatto.

### 技術情報

plastic! berlin メガネは、有名な弾性に富んだステンレススチールのみを材料として出来ているではありません: 新たに加わったものが、フロントとつるの先端のための高価値なアセテートです。かの有名なネジを使わない蝶番はいまや、二部構成のステンレス製クリップを使って、アセテートと結合されています。ネジや接着剤を全く使わず、射込まれてもいません! この新しい技術もメガネの世界では他に類を見ません。

ステムの側面に廻らされた溝は2本の細いクリップで抱かれ、典型的な金属製留め具で固定されています。個々の部分を互いに結合するためには、工具は全く必要とされません。つるはいつも通りにフロントにパチンとはまり、再び簡単に外せます。

レンズは、アセテート製メガネで通例な通りに、加熱してはめ込まれています。つるは、plastic! メガネでは、そのために外される必要はありません。アセテート製メガネは鉱物質レンズの使用に理想的です。プラスチックレンズを選択なさる場合は、次のことにご注意ください: ic! berlinの plastic!**メガネ にはポリカーボネートレンズは使用しないでください**。アセテートとポリカーボネートは犬猿の仲です。これはしかしメタルメガネには当てはまりません。シートメタルメガネにはポリカーボネートをお勧めします。

plastic! メガネも並外れて軽量です。重さは16～20gしかありません。アセテートは非常に優れた耐性を持つ素材ですが、それでも、過剰に攻撃的な機械的な力を作用させないようお勧めします。

### 기술 정보

아이씨 베를린의 플라스틱 안경은 현재 잘 알려진 유명한 스테인리스로만 제작된 것이 아닙니다.

최고의 품질을 자랑하는 아세테이트가 새롭게 앞쪽 프레임과 템플의 끝부분에 사용되었습니다. 그 유명한 나사 없는 힌지가 이번에는 두 조각의 스테인리스 스틸 클립을 이용한 아세테이트와 결합되었으며, 나사는 물론 접착제 또는 금속 못 등으로 이어주는 식의 방법은 일체 사용하지 않았습니 다! 다시 한 번, 이 기술은 정말 세계에서 유일무이 한 기술입니다.

바늘처럼 생긴 튜브는 직각 모양의 원 안에서 힌지와 안경의 앞면을 연결해 줍니다. 이 튜브는 두 개의 작은 버클과 함께 고정되며, 우리의 전형적인 메탈 버클 형식인 힌지 클립에 의해 안전하게 끼워 집니다. 각각의 파트를 연결하기 위해서 어떠한 도구도 필요하지 않습니다. 늘 같은 방식으로 템플은 찰락 하는 사이 안경의 앞부분에 끼워지며, 역시 쉽게 분리될 수 있습니다.

렌즈는 아세테이트 제작의 일반 과정과 같이 열에 의해 용화됩니다. 플라스틱 안경의 템플은 이 과정에서 분리될 필요가 없습니다. 특히 아세테이트 안경은 광물질을 바탕으로 제작된 렌즈에 이상적으로 만들어 졌습니다. 플라스틱 안경에 적합한 렌즈를 결정하시게 되었나요? 그렇다면 명심하십시오: 폴리카보네이트 렌즈는 플라스틱과 함께 사용될 수 없습니다! 폴리카보네이트 와 아세테이트의 관계는 고양이와 개의 관계와 같습니다. 메탈 안경에 사용할 때는 물론 얘기가 다르며, 오히려 저희는 메탈안경에 폴리카보네이트 렌즈를 권해드리기도 합니다.

플라스틱 안경도 역시 매우 가벼우며, 16 -20그램을 넘지 않습니다. 또한 아세테이트는 단단하고 견고한 재질이기 때문에, 말 할 필요도 없이 불필요하게 힘을 가한다거나 하는 것은 바람직하지 않습니다.

Colours shown in this catalogue are printed representations of real life products and should be viewed as close approximations.

Die im Katalog dargestellten Farbkombinationen dienen als Entscheidungshilfen und können von den Originalfarben abweichen.

Les combinaisons de couleur présentées dans le catalogue servent d'aide à la décision et peuvent différer des couleurs originales.

Le combinazioni di colori rappresentate nel catalogo vi aiutano a fare una scelta. Possono tuttavia essere diverse dai colori originali.

カタログに掲載されている色の組み合わせは、商品を選ぶさいの目安となるものであり、実際の色とは異なる場合があります。

이 카탈로그에 소개된 모든 칼라 조합은 칼라 본연의 색채와 다를 수도 있으며, 가장 가까운 근사치로 보시면 됩니다.

# The Hinge

Our revolutionary, patented interlocking hinge system means there are no screws to fall out or break. ic! berlin glasses can be dismantled and reassembled in a matter of seconds, by hand, without extra tools.

There are several flavours of our hinge, but none of them have screws, nails, bolts, glues, rubber bands or tiny little goblins holding everything together.

## The open metallic hinge

## The open acetate hinge

## The anchor clip

For extra security all 6mm hinges can be closed by replacing the standard clip with an anchor clip.

## The closed hinge

The ic! berlin closed hinge locks the temple in place without a clip. It comes standard on all kids frames and selected models with 6mm temples. For extra security, all open 6mm hinges can be closed by replacing the standard clip with an anchor clip. Anchor clips can be ordered through your Sales Representative.

## The inclination hinge

up OR down

Nobody's perfect. Some of us have one foot larger than the other, one leg longer than the other, one boob bigger than the other. Most of us have one ear ever so slightly higher than the other, which can cause your glasses to sit crooked. We invented a quick and easy fix to adjust the temples up or down by three degrees so your glasses will always sit level.

## The silk hinge

take it off!

...and put it back!

# Know your nose pads

## The East Nose

## TPE (left and right)

## Silicone (universal)

## Acetate (universal)

## Adapters

TPE and silicone drop-shaped nose pads can be fitted to frames with acetate nose pads. To ensure a secure fit, an acrylic adapter must first be inserted into the nose pad cavity. The new nose pad can then be mounted as usual, ensuring that the adapter remains on the outer of the nasal arm (away from the nose when the frame is worn):

**ACHTUNG!**  
**CHOKING HAZARD!**  
Keep out of reach of children and pets.

# The Temples

If you notice a drop in tension in the hinge, simply bend the middle 'finger' back into its original position, so that it is lower than the outer two.

The outer 'fingers' keep the temple sitting securely in the hinge. If they are spread too wide, the temple will move around in the hinge. Just bend them back together to keep everything nice and snug.

Thermoplastic elastomer (TPE) temple tips can be easily bent by hand to fit behind the ears, no heat necessary! Acetate temple tips, however, must be heated before adjusting.

## The plotic! Temple tips

# The Lenses

## Edging and fitting new lenses

When fitting new lenses, we recommend high-index plastic ( $n \geq 1.6$ ) or Trivex. The groove should be between 0.65 mm and 0.7 mm wide. A correct fit ensures the perfect tension in the hinge and gives the frame the necessary stability: when a lens is cut to the correct size the space between the two sides of the hinge will be parallel.

## Fitting lenses in a 4 mm hinge frame

With the superfine 4mm hinge we streamlined the lens fitting process: you can now change the lenses without removing the temple. All you need is a little piece of ribbon or nylon:

## Fitting lenses in a rubber frame

Fitting lenses into a rubber sunglass is simpler than you might think. It follows the same principles as fitting an acetate frame: the “pop-in” method, from front to back (from outside in).

Starting at the upper temporal corner, place the glass into the metal ring and then into the upper nasal corner; the top half of the metal ring should sit snugly in the groove. Continuing from the nasal corner in an anticlockwise direction, press the lens into the frame bit by bit until the it clicks into place back at the temple. **CLICK = IN.**

Please note:

\_The groove must be a little deeper than by other ic! berlin frames: 0.4mm (instead of 0.3mm) and between 0.6 and 0.65mm wide.

\_To avoid chipping, bevel the rear/inside of the lens at 42°.

\_As with metal frames, only use high-index lenses (e.g.  $n = 1.6$ ).

silk

## Fitting lenses in a Silk frame *new!*

Silk frames have been designed to be fitted without helpers or tools, from the inside out (back to front). Chamfer/bevel the front of the lens at 42° to help ease it in and avoid chipping.

## Sun lenses

All ic! berlin sunglasses are fitted with super lightweight, super strong plastic lenses that offer full protection against harmful UV rays. Our sun lenses took the dropball test and aced it (F.D.A 21-CFR 801.410).

This table explains filter category levels of sunglasses but please note: the filter category is the amount of light allowed to pass through the lens and does not represent UV absorption. If your sunglasses are fitted with polarized lenses please be aware of possible colour distortions or blackout with some LCD screens

	<b>0</b>	No tint. No protection from sun glare	
	<b>1</b>	Light tint, little protection. Best for cloudy conditions.	
	<b>2</b>	Medium or graduated tint, moderate protection. Best for sunny conditions.	
	<b>3</b>	Dark tint, lots of protection. Best for bright sunlight and driving.	
	<b>4</b>	Very dark and special purpose lenses. Not suitable for driving.

*Francesca is so Italian, her superpower is the ability to make the best cappuccino foam this world has ever seen. Our very own budding Fellini enjoys collecting lonely socks, surrounding herself with greenery and sunshine (why are you in Berlin?!) and saying 'abbracciamoci', which is a challenge unto itself. Try it with me: ab-brach-chia-mo-chi. Now you have to hug whoever is next to you, because that's what abbracciamoci means: let's hug. <3*

Rayane has that totally relaxed and free  
 aura that you only get when you give up your  
 smartphone. Now that he doesn't/can't check  
 Facebook and Instagram every 15 minutes, he's  
 free to enjoy the simple pleasures of life,  
 like Kinder Schoko-Bon, football and collecting  
 Berghain flyers.

*Rosi has one of the sharpest eyes at ic! berlin: she can spot a dodgy frame or uneven colour at 50 paces and stop it every seeing the light of day. We could change "handmade in Berlin" to "approved by Rosi", that's how good she is. In her off time, Rosi prefers shopping at flea markets to department stores and she is currently saving for a holiday to Mauritius. I wonder if Miray will go too. Do cats like Daiquiris?*

*We sit, we wonder why-yi-yi-yi Sandy would waste her Sundays pumping and sweating at Body Pump. But she's Swiss, which means she probably eats a lot of cheese, and low-fat raclette is sacrilegious. Aside from melting cheese, Sandy's favourite smell is that of freshly sawn wood and her favourite word is magnifique. Bon.*

Mathias Bothor is THE photographer. Check his webpage ([mathiasbothor.com](http://mathiasbothor.com)) and you can see why I was a little afraid to shoot him. As you also can see: he is a great model and very easy to shoot - and there was no moment, he gave me bad feelings, while me, sheet metal glasses seller Ralph, shot him.

Torsten is a keen model builder, so coming to work at ic! berlin was a no-brainer because he gets to build stuff all day. Well, cut stuff with lasers, which is still pretty cool. Though he's been a Berliner since he was 5 years old, Torsten still dreams of his home in Saxony, or, more specifically, his grandma's Saxon Quarkkeulchen, which are like little potatoey pancakes served with homemade apple sauce. *Omnomnomnom.*

North Sea native Alexander would one day like to learn how to kitesurf. He's already halfway there - he could use his beard as a kite. If his beard fails him and he sinks he could fulfil his other lifelong fantasy of diving with manta rays, so it's win-win, really. But that beard would never fail him or anyone, ever. That is a beard for the ages.

Though she was born in Canada, Christina has been here since age 9 and is as German as Spaghettieis. For those who have never had the pleasure, Spaghettieis is a German "delicacy" where ice cream is served in the form of spaghetti, complete with strawberry (tomato) sauce and grated coconut (parmesan). Because Germany.

When Nguyet came to ic! berlin HQ for her interview she immediately felt at home. She says it's because the foyer looked as chaotic as her bedroom (editor's note: creative chaos!), but we like to think it's because we're so welcoming and lovely and nice to be around. Nguyet's favourite smell is her baby nephew after bath time and she would one day like to learn to cook like her mama & papa. We just hope these two things are unrelated.

*The best piece of advice Birgit ever received came from our General Manager: "accountants aren't supposed to be popular". She's been doing our books for over ten years, so there must be some truth on it. Birgit has four pet cockatiels, collects puzzle books and enjoys insulting people in Plattdeutsch because no one outside of Lower Saxony understands her when she does. Sigelär!*

*Carla grew up on Sardinia, which makes her a sardine. Actually, she's Sardinian, but sardine is funnier. Being a good sardine Sardinian, Carla makes a mean tiramisu. She prefers flea markets to department stores, dogs to cats (smart woman!) and singing in the shower to singing with the ic! berlin Monday morning choir, though she rocks them both.*

*One of Jacqueline's dream holiday destinations is the land of chilly bins, jandals and hobbits. Something about the beautiful landscapes, the awe-inspiring glaciers and the funny way New Zealanders pronounce "fish and chips" really appeals to many Germans. Jacqueline prefers spring to autumn, loves the smell of petrol in the morning and once bought a Backstreet Boys album. But hey, we all make mistakes.*

*Simone knows more about cars than I do, but I know more about glasses than she does, so we'll call it even. This Frankfurter enjoys electronic music, audio books and sleeping for 14 hours at a time. A word of warning though: she should not be disturbed before her morning green tea has had time to work its magic.*

We have a saying in German: "he who buys cheap buys twice." These are the words Robert lives by, though he still prefers rummaging through flea markets to shopping in fancy department stores. Probably something to do with his hobby-slash-superpower of fixing broken-down bits and bobs. Robert also believes life would be better without smartphones, but then how are we supposed to crush candy or shoot birds at pigs?

*Chrissy grew up in Mannheim and came to Berlin for the fresh air, which makes you wonder: exactly how bad is the air in Mannheim? Our favourite Monnemerin wants to one day ride a dogsled through the snow under the northern lights and if (god forbid) she were on death row, her last meal would be her ex-housemate's spaghetti bolognese. Oh, and she can see through her fingers.*

Though she was born in Bavaria, Katha speaks almost perfect German. When not directing art, Katha enjoys polka-dots, peanut butter cups and educating her team on the proper way to enjoy Bavarian haute cuisine, like Weißwurst with beer. For her next birthday party, Katha wants David Hasslehoff and Napoleon Dynamite in a pole-dancing contest. She would of course be the judge.

Would you believe me if I told you the first CD Lisanne ever bought was by Kylie Minogue? Once you discover her personal hero is Cher the pieces begin to fall into place. Lisanne and her bulldog Bubbles enjoy the smell of freshly fried mincemeat, collecting bitches and saying Schwarzwälder Kirschtorte. You don't think a bulldog can say Schwarzwälder Kirschtorte? You haven't met Bubbles...

*Maira is a woman after my own heart: her two biggest pleasures in life are coffee and beer. Brazilian by birth, Berliner by choice, Maira first came to Berlin to explore her family's roots, but ended up staying for the pommes. We Berliners really do know our way around a potato.*

*Oumi loves cinnamon rolls and Ben & Jerry's, so all her Christmases came at once when Ben & Jerry released their Cinnamon Buns ice cream. Oumi's favourite word (and one of mine) is guuurl and her favourite pastime is jam skating. Jam skating, for those who didn't already know, is kind of like ice dancing, but on roller skates and much, much fiercer. Guuurl.*

How did it take us 20 years to name a sunglass Sunny? You would think it's a given, especially with this ray of sunshine working with us for over 10 years. Being a native Berliner, Sunny's favourite word/phrase is 'du Wurst', which means 'you sausage' and sounds just as delightful in German as it does in English.

,The best piece of advice Jan has ever been given is: don't ever bleach your hair again. Profound words. I think it was Ghandi who first said that. While many of us spend our Sunday mornings in bed, Jan spends his in downward dog. Between workouts and yoga sessions Jan enjoys eating his grandmother's gulasch, getting tattoos and the diesel-fresh air at gas stations.

Patrick Mohr, like most of us here at ic! berlin, loves a good sneaker. His collaborations with Reebok and KIX have people camped out on the street. As a model he's walked catwalks all over Europe and as a designer he's worked in the upper echelons of haute couture with the biggest names in fashion and design. Most recently, *Spongebob Squarepants*.
